Here Is the Foundation of Our Belief:

1. The Cars are backed and guaranteed by one of the oldest and most reliable concerns in America.

2. They are equipped with the best bearings money can buy. Your bearings are

- the life of your car, just as the jewels are the life of your watch. 3. They have an abundance of power in proportion to weight. Practically the same motor has been used for the last three years. This year the bore is larger,
- making it much more powerful. 4. They are equipped with the same starting system used for the last two years, on which we have practically not had a single failure.
- 5. They are equipped with full-floating rear axle, which is recognized as the best type on the market to-day.
- 6. Bodies are of stream-line type, with large close-fitting doors, and elegantly upholstered with the best grade hand-buffed leather.

7. The mechanical construction is practically the same as last year's models, which gave perfect satisfaction. Ask Studebaker owners. Add to This the Fact That We Give Our
